Complete one Page 2 for each architectural feature at the site.

Architectural Feature # 1

Construction Date Feature Type 9 Condition 4
Feature Date 2 Context 7 Plan Shape 5
Structural System 25 Primary Exterior 26 Style Other Style
Original Owner's Ethnicity Secondary Exterior Architect/Builder

Other Information:

Foundation Poured concrete Stories 1
Roof/Cornice Gable
Window Openings with some framing
Dating Method(s): Estimate

Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
Contributes to a potential district
No nomination potential
Will not contribute to a district
Potential district—feature would be a contributing element if other properties constitute a district
Thematic nomination potential
Component of a historic site or landscape
Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Egg Creek Township SchoolSITS# 32 MH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete foundation. The gable roof of both the school and entry are mostly covered with wood shakes with metal capping and finials. Remnants of a chimney sit at the north end of the peak of the roof. The soffits are open. The building measures 24 feet north to south and 14 feet east to west. It is one of the smaller schools I have seen.

The exterior walls begin with a wide, trim board under the peaks of the roof with 6 inch wood lap and 6 inch corner trim completing the siding. There is a louvered vent high on the north wall. Three window openings can be seen on both the east and west side of the school. No glass and remnants of double hung framing can be seen on the west side. There is a small window on the west wall of the entry, most likely a fuel door. A concrete pad leads to the entry and the broken 5 panel wood door. There is yet another 5 panel door that leads into the school room. The walls and ceiling of the school and entry are lathe and plaster. Much of the ceiling has fallen in. There is wainscot on the walls in both the school and entry. The tongue and groove flooring is heaving and falling away. There are no blackboards. Wire and light fixtures suggest electricity.
