PAGE 3—Feature Data**Field Code Rosehill Township SchoolSITS# 32 MH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sittin on a foundation of rocks and concrete. The gable roof is covered with asphalt shingles. The soffits are closed. There is a red brick chimney outside the north end of the school, running right up the wall. There are small vents located on both slopes of the roof. The building measures 24 feet north to south and 14 feet east to west.

There is a wide trim board running under the soffits at the peak ends of the roof with the remainder of the siding being 6 inch wood lap with 6 inch wood corner trim. On the east wall of the school there are three areas that have been sided and the straight seams would suggest that they filled in three window openings. There are two double hung windows on the south side to the right of the entry door. A concrete step leads to the solid core, locked entry door. There is another smaller, double hung window at the south end of the west wall along with a bank of 6 larger double hung, 2 over 2, windows with storm windows on them. Glass is intact on all the windows. Wiring on the south wall of the school with a meter box indicate electricity. The interior ceiling and walls are wallboard with wainscot. A blackboard is on the north wall.
