PAGE 3—Feature Data**Field Code Red Cross Township SchoolSITS# 32 MH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete foundation. The hip roof of the main building as well as the gable roof of the addition are covered with wood shakes topped by metal capping and finials. There is a red brick chimney on the south slope near the peak. The soffits are closed with beadboard. The building measures 38 feet north to south and 220 1/2 feet east to west. The addition on the west side measures 12 feet by 10 feet.

There is a wide trim board running under the soffits on all sides of the school as well as the addition with the remainder of the siding being 6 inch wood lap with 6 inch wood corner trim on the main body of the school. The corner trim on the addition is metal corner caps. There are no open windows, but boarded openings would indicate windows on the west side of the addition, either side of the door on the south side and a bank of 6 windows on the east side. No picture of the east side. The south side has a wood ramp leading up to a wood porch and the solid core, locked entry door. Another piece of plywood above the door would suggest the presence of a transom. There is a light fixture above the door suggesting electricity. A flag pole is to the west side of the porch in the south yard.
