Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

PAGE 3—Feature Data

Field Code Levey School #2SITS# 32 ML**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

Levey School #2 is a wood framed building with horizontal wood siding. This school is also located in Greatstone Township. This building was used as a township meeting place until the early 2000's. The exterior of the building shows a door to the east with a transom opening at the top. This is also the wall where the electrical wires can be seen. There is an outside light above the door as well. The south wall has replacement windows, two sets of side to side sliders. It looks like the siding on the south side has been replaced around and below the walls. There are no straight seams where they filled in the openings. On the west end of the building are two areas where the windows were boarded up and siding was put into the openings, also a similar window was covered up on the north side. These windows were all much larger than the replacement windows. The roofing is asphalt shingles with a few missing at the west end. A newer looking chimney can be seen on the roof near the east end of the school. The building sits on a poured concrete foundation. It measures 20 feet north to south and 32 feet east to west.

Entry to the school is from the east and as you step into the school there is a door to the immediate left that leads into the coal bin. I can see that the fuel door into that room was covered up from the outside. Straight ahead of the entry door can be see the chimney. To the right is another door that leads into the coatroom. The hooks are still on the wall. There is a bare bulb light in the ceiling in this room. The walls and ceiling are covered with thin wall board which can also be seen in the main body of the school. There are two hanging light fixtures in the school. The floor is 6 inch wide planking. There are blackboard on the north wall and part of the east wall as well. Wainscoating can be seen all the way around the room. There is no evidence of a stove in the school other than a chimney opening high on the east wall.

The last year school records were filed for the school in Greatstone Township was 1959.
