NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data

Field Code Douglas School #3SITS# 32 ML**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

An example of an interesting, one-room prairie school. This school has intersecting roof lines with an entry and another small room off the main room of the school. The roof is covered with shakes and the building has 6 inch lap siding. Most of the windows on the south side are covered with shutters. This building has 6 inch boards trim at the corners and 8 inch board trim at the top and bottom of all the outside walls. High on the east wall of the main body of the school are two boarded up windows on either side of the entry. The entry itself has a doof facing the east that accessed by crumbling concrete steps. The door has most of 6 panes of glass intact, one has been replaced with wood. There is a light fixture near the door indicating electricity. There is a window to the north of the door. An addition to the north side of the school has a cupola with a flagpole. Also in that north room is a window facing to the west. There may have been a door into this part of the school as shown by wood closing up an opening on the north side. The chimney is above the entry and the bricks are starting to fall away and it leans to the north. The roof peaks and seams are all covered with metal caps. On the north side of the main body of the school there appear to be two more windows that were boarded up at some point.

This school was moved in the 1930's or 1940's from the original location 3 miles to the southwest. It was placed on a poured concrete basement. There is outside access to the basement on the north side as well as steps inside in the north room. The school measures 26 feet east and west and 20 feet north and south with the entry measuring 8 feet east and west and 12 feet 4 inches north and south. Additionally the room to the north measures 8 feet north and south by 12 feet 4 inches east and west.

The entry of the school has lath and plaster walls and brown colored wainscoting. Walk through the entry into the main body of the school and directly to the right is a small room, half of the entry, where there are coat hooks and paper toweling indicating, perhaps, the coat and wash room. There is wainscoting in this room as well. The main body of the school has 5 double hung windows facing south. Some one made screens panels to place in the bottom half of some of the windows. Some of the window shades are still hanging at the windows. The floor is tongue and blackboards cover the entire west end of the room and 1/3 of the north wall. Any wainscoting in this room was replaced by wood paneling. The walls are covered with composite wall board and ceiling is covered with tiles. There are ceiling mounted light fixtures. The north room has wall board above wainscoting, all walls in the school are painted light green. There is a door to the basement on the east wall of this north room. The doors might be original, tall, five panel doors with wide dark wood trim. I didn't go down into the basement.

The school closed in 1960.
