**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Farmvale SchoolSITS# 32 MN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a foundation of poured concrete. The gable roof of the school is covered with metal sheeting. There is a red brick chimney located at the north end of the peak of the roof. The soffits are closed. The school measures 24 feet north to south and 18 feet east to west with the entry measuring 14 feet east to west and 10 feet north to south.

The siding begins with a wide trim board under the peak end of the roof. The remainder of the siding is 6 inch wood lap with 4 inch corner trim. The paint appears to be very recent. Two concrete steps lead to a concrete platform that gives entry to the school. There is a 5 panel wood door with a covered opening at the top that was likely a transom window. There is one small fixed pane window on the east wall of the entry. The entry walls are finished with wood lap inside. Another wood door with decorative windows across the top gives entry to the school. The walls inside the school room are finished with wallboard. The east wall has 5 double hung, one over one, windows with much of the glass remaining and all are covered with translucent plastic on the outside. The window trim is wide boards with a decorative finishing piece at the top of each window. The ceiling of the school room is beadboard covered with ceiling tiles. The ceiling is slanted to the walls on both the east and west sides. The floor is tongue and groove hardwood. There are blackboards on part of the west wall and also the south wall to the entry door. Electricity is present with wires and fixtures apparent.

Early 1940's the school was also called the Momb School.
