**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Clearwater Township SchoolSITS# 32 MN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The hip roof of the main body, the half hip of the east addition as well as the hip of the dormer are all covered with failing wood shakes. The peak of the main body has metal capping and finials. The metal capping has two pointed metal stakes at either end, aimed at the sky. There is a dormer on the south slope of the roof and the front opening, perhaps the housing for a bed, is boarded up. There is a flagpole at the top of the dormer. The soffits are closed with ship lap. There is a red brick chimney where the dormer meets the roof on the south slope. The building measures 20 feet east to west and 42 feet north to south, the addition on the east side measures 12 feet by 6 feet.

There is a wide trim board on the exterior wall just under the soffits on all sides of the school and addition. The rest of the siding is 6 inch wood lap with no corner trim. There is waterboard and another wide trim board at the bottom of the siding. A concrete step leads to a solid wood door with a large transom above it. There are two smaller double hung windows to either side of the entry door that give light to the coatrooms. The entry has doors to the left and right that go into the coatrooms and access to the school room is through the coatroom here the doors are three wood panel, with lattice work at the top. Another door, on the east wall of the east room leads to a stairway to, perhaps, some basement space. No indication that there is basement from the outside of the school. The interior walls of the school are covered with wallboard with a plate rail on all walls. The ceiling is covered with beadboard. The floor is tongue and groove hardwood. There is a bank of 6 windows on the west wall, two middle windows are two over two and the others are simple double hung with some glass. There are remnants of top pull window shades. There are two double hung windows in the east addition, one is covered. There are blackboard across the entire north wall of the school room. Light fixtures and exterior wiring suggest electricity. There are old student desks in the school room as well as a teachers desk.
