NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Wayzetta Township SchoolSITS# 32 MN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The gable roof of the main body, the intersecting entry and the half hip of the northern addition are covered with wood shakes with metal capping and finials. The soffits are closed. The main body of the building measures 20 feet east to west and 28 feet north to south with the north addition measuring 12 feet east to west by 6 feet north to south. The west entry measures 8 feet by 20 feet.

There is a wide trim board on the exterior wall just under the soffits on the peak ends of the school. The siding is 6 inch wood lap with 6 inch wood corner trim. There is waterboard near the bottom with another wide trim board to finish the siding. A newer solid core door gives access to the entry from a large concrete platform. The entry looks to have been added onto with the original gable edge on the south side extended to cover more entry space. There siding has seams that would suggest this addition came later as well as the wainscot that ends at the addition seaming inside. There is a 4 pane window near the south end of the entry with another larger double hung window further to the north. An opening above that window is boarded up. On the east side there are two double hung windows with intact glass. The north addition, built to house bathrooms, has two small fixed pane windows with glass in the east one and the other covered. The interior of the school has walls covered with wallboard with wainscot. There is a drop ceiling with acoustical tiles. There are blackboards, one on the west wall from the school room door to the south corner and another small blackboard on the west half of the south wall. The bathroom walls are wainscot with paneling on the upper half. Each bathroom has a 5 panel wood door. The floor is tongue and groove hardwood. Light fixtures on the ceiling suggest electricity. A furnace with pipe connected to a nonexistent chimney is on the north wall of the school room. The chimney opening has been covered with metal sheeting.
