NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Van Hook township SchoolSITS# 32 MN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The hip roof of the main body and the gable roof of the entry are covered with asphalt shingles. There is a concrete chimney with fence posts at toe corner for stability and this is on the west slope of the entry roof. The building measures 28 feet north to south and 18 feet east to west with the entry measuring 8 feet north to south and 18 feet east to west.

There is a side trim board on the wall under the soffit on the four sides of the school building. The rest of the siding is 6 inch wood trim with metal corner capping. There is a solid, newer, locked door on the south wall with a boarded up transom. Two shuttered windows are to either side of the door. There are two shuttered windows on the west side as well as the east side. Wiring and a meter holder on the west wall suggest electricity. No information on the inside.
