Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

NDCRS ARCHITECTURAL SITE FORM**PAGE 3—Feature Data**Field Code SITS# 32 **Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The hip roof of the school is covered with asphalt shingles as is the roof of the cupola. The cupola is entirely enclosed with wood and more asphalt shingles finish the bottom 1/3. There is a flag pole at the peak of the cupola. On the north slope of the roof of the school there is a metal stove pipe. The soffits are closed. The building measures 32 feet north to south and 24 feet east to west.

A wide trim board runs under the eaves on all four side of the school. The siding is 6 inch lap with 6 inch corner trim. At the bottom of the siding there is a skirting board with water table. A simple wood door leads into the entry. To either side of the door are two boarded up window openings, the one to the left is covered up both inside and out. To the right there is a multipane, double hung window with glass seen from inside the entry. Several windows used to be on the east side and all are covered both inside and out. On the north end of the school there is another covered window opening toward the east side of the school and a large, multipane double hung window with glass closer to the west side. This window was uncovered and shed light inside the school. One more small opening on the south end of the west wall is a fuel door.

The interior of the entry is closest to the original as it has lathe and plaster on the walls and wainscot the lower 1/3 of the wall. There is a 5 panel wood door leading into the main room of the school. The ceiling in the entry is failing and insulation can be seen where the wall board has fallen away. Inside the main room of the school the walls are a mixture of wallboard and lathe and plaster. The ceiling in the big room is also lathe and plaster. The building was used as a ski rental building for a few years before closing the doors. The floor throughout is tongue and groove hardwood. There is a plate rail a foot down from the ceiling in the big room. The west wall shows where the blackboard was and another blackboard still hangs on the south wall of the main room. The fuel room was opened up for storage. There are light fixtures in the ceiling to indicate electricity.

PAGE 4—SITE DESCRIPTION**

Field Code

SITS# 32

Complete one Page 4 for the entire site.

2. Owner's Contact Information:
United States of America

3. Access (to rural areas):
From Huff ND, go north on Highway 1806 two to two and 1/2 miles to find County Road 80 on the west side of the road. This is also the road that goes to Huff Hills Ski area. The school is at the corner of these two roads.

4. Site Area (ft²): _____

5. Description of **SETTING**:
The school sits on a small rise with a farm just to the south. There are farm fields to the east, northeast and northwest. West it gets quite hilly. Very close to the Missouri River.
