**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Iowa Township School #1SITS# 32 MT**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The hip roof has very few wood shakes on the roof planking and the planking is also quite compromised. The soffits are open and there is no chimney. The building measures 28 feet north to south and 18 feet east to west.

Wide trim boards runs under the soffits on all four sides. The remainder of the siding is 6 inch wood lap with metal corner caps. Near the lower part of the siding there is a wide trim board with water table. On the north wall of the school there is a fuel door. There is an entry without a door, reached by a concrete pad. There are coat rooms to either side of the entry foyer. One double hung, two over two, window is in each coat room, the west window is covered and has glass, the east window is uncovered and has some framing and glass. The window openings in the main body of the school are all covered with particle board and there is no glass or framing. The walls are partially covered with lathe and plaster. The ceiling only has lathe remaining and the daylight shines through. The building was used for grain storage. The floor is tongue and groove hardwood, in bad shape. There are no blackboards but the north wall shows where it was. No wainscot or electricity.
