1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school sitting on the dirt. The roof has asphalt shingles covering much of it. Metal capping finishes the ribs. Holes are seen on the west slope of the roof. There is no chimney. The soffits are closed.

The siding begins with a rake board under the eaves on all sides. The rest of the siding is 4 inch wood lap with 4 inch wood corner trim. There is a double wood door at the east end of the school that gives access for use as a garage or perhaps storage. To the left of this door is a window opening. The south wall has a bank of 6 windows, all covered with a variety of materials ranging from metal sheeting to plywood to horizontal planks. The floor is tongue and groove hardwood. There is wainscot on the walls. The ceiling and walls were all falling in, looked to be some plaster as well as beadboard. Evidence of the blackboard remains on the north wall. Electricity was present at some point.
