The feature is a small one room prairie school on a poured concrete foundation. The gable roof of the school and entry have green asphalt shingles with many holes. The shed roof to the west also has some green asphalt shingles. There is part of a red brick chimney at the west end of the roof peak. The soffits are open.

A rake board begins the siding under the eaves at the peaks of the roof. The siding is 6 inch wood lap with 6 inch wood corner trim. The west shed has an entry door that faces to the south. Pattern in the siding of the west wall of the shed would indicate a window in the past. The floor of the shed is dirt. The east entry has a 5 panel wood door. There are two double hung windows on both the north and south walls with a little bit of framing and no glass. The walls are lathe and plaster behind wallboard with wainscot to finish the bottom 1/3. The ceiling is beadboard. The floor is tongue and groove hardwood. Three small slate chalkboards are located on the west wall. Wires on the exterior of the building indicate electricity.
