PAGE 3 – Feature Data**Field Code** Jorgenson School**SITS#** 32 MZ**Complete one Page 3 for each architectural feature at the site.****1. Feature Description, Integrity, Eligibility:**

The feature is a small, one room prairie school on a concrete foundation. It was moved to this location for use as a barn. The gable roof is covered with wood shakes with a bit of metal capping remaining. There are finials at the roof ends. The chimney is gone. An interesting feature on this building is the cornice returns.

The siding begins with a wake board under the peak ends of the school. The remainder of the siding is 6 inch wood lap with 6 inch wood corner trim. There is no entry on the school. There is a door opening and two window openings on the northeast side of the school. The southwest end has more openings as well as one more on the southeast side. The flooring was removed.
