Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
Contributes to a potential district
No nomination potential
Will not contribute to a district
Potential district—feature would be a contributing element if other properties constitute a district
Thematic nomination potential
Component of a historic site or landscape
Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**Field Code Clara Township SchoolSITS# 32 NE**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

This feature is a one room prairie school on a concrete foundation. The hip roof is blue metal with metal capping on all four side seams as well as the peak of the roof. There is no evidence of a chimney. The eaves have enclosed soffits. The building measures 34 1/2 feet north to south and 20 feet east to west.

There is a wide header running under the eaves on all four sides. Siding is 6 inch wood lap with 4 inch wood corner trim. An old plywood door gives entry into the school. Above the door is a transome with glass intact. The windows of the school have all been replaced with smaller, double hung windows. All the glass in these windows is intact as well. There are three windows on the east side, two that face north and one more on the north end of the west wall.

Stepping into the school there is an entry area with, perhaps, a coat room to the right. There is door into the main body of the school from the entry area. In the main body of the school, about the middle of the north end of the school and along the entry wall there is a concrete chimney stack. The floor is hard wood tongue and groove. The walls are paneled about what looks to be a chair rail dividing the bottom one third of the wall from the paneling. The lower part of the wall is covered with wall board. The ceiling is wall board over lathe and plaster and most of that is falling in. I suspect the new roof was put on after a lot of weather damage.

There is a fuel oil barrel on the west side of the school, perhaps a heat source. There is also electricity in the school as seen by the outdoor fixture and more light fixtures inside the school.
