NDCRS ARCHITECTURAL SITE FORM PAGE 3—Feature Data

Field Code Lakota Township School	SITS# 32 32	
-----------------------------------	-------------	--

Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

This feature is a simple, wood framed one room school. I am not sure if the school was moved to this location or the farm was built around the school. There is a concrete step at the door. The roof is covered with asphalt shingles. There is a red brick chimney at then west end of the roof peak. The eaves have closed soffits.

There is a 8 inch header under the peak of the east end of the roof, I did not see the west end of the school. The siding is 6 inch wood lap with 4 inch wood corner trim. A newer door with windows in the top half of the door gives entry into the building. There are two windows on the east side, one an older double hung two pane window and the other a newer double hung window. There are more windows on the west side, again I didn't go into the yard to see the west side.

A light fixture on the east end with outside wiring give evidence of electricity.
