PAGE 3—Feature DataField Code Adler Township SchoolSITS# 32 NE**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a large one room prairie school sitting on to the north of water and cattails. I wasn't able to get close enough to look inside this building. The roof is covered with wood shakes and the peak is enclosed by metal roof capping with ball finials. There is a red brick chimney located on the north slope of the roof near the east end. The eaves have closed soffits.

The school entry is large, located at the west end of the school. On that end there are two smaller, double hung windows with intact glass. The door is located on the south side of the entry, looks to be a 5 panel wood door. The south wall of the school has a bank of 7 double hung windows with more than half the glass gone. There is a wide header under the eaves of the peak ends of the roof and entry. The siding is wood lap with metal corner trim. Under the east most windows there is missing siding and the window appears to tip toward the east. Perhaps there is water under the building causing it to buckle. Electric wires show electricity was present.
