**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Adler Township School #3SITS# 32 NE**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

Adler School is a one room prairie school relocated to a farm site for use as a storage building. The school is in very good shape. It sits on a concrete foundation. Roofing is asphalt shingles and there is a brick chimney near the south end of the main body of the school. All the soffits are closed. There are wide trim board just under all peaks of the gable roof. The siding is 6 inch wood lap with 6 inch wood corner trim, all nicely painted. There is a bank of 5 windows on the south side, all glass intact. Two more windows are on the east side of the entry/porch and they are shuttered. One window on the north side appears to be a replacement window, glass intact here as well. The entry door is a newer combination door with a screen for air flow.

The entry itself is has a sloped ceiling and the walls and ceiling are covered with a mixture of wallboard and beadboard. The floor in the entry is tongue and groove hardwood. There is a 5 panel door into the school room. The floor in the school itself is wood covered with tile. Walls in this part of the school are wallboard panels. The ceiling is covered with accoustical tiles over paneling. Lights hang from the ceiling and conduit runs along some walls indicating the presence of electricity.

The school measures 36 feet east to west and 16 feet north to south. The east west measurement includes the entry. No blackboards remain.
