Field Code Meyer Township School #1

SITS# 32 PI 85

Complete one Page 2 for each architectural feature at the site.

Architectural Feature # 1

Construction Date 1897

Feature Date 1880-1900

Structural System Wood Frame

Original Owner's Ethnicity _____

Feature Type 9 - School; Church school

Context Education

Primary Exterior Wood, Horizontal Siding

Secondary Exterior _____

Condition Good

Plan Shape L-Shaped

Style Other Style

Architect/Builder _____

Foundation Unknown Stories 1

Roof/Cornice Hip roof with gable at the entry

Window Double hung, multi pane with most of the glass intact

Dating Method(s) Original Recording of the site

Miscellaneous Information _____

Feature Preservation Recommendation(s) (Check all that apply):

Individual nomination

Contributes to a potential district

No nomination potential

Will not contribute to a district

Potential district—feature would be a contributing element if other properties constitute a district

Thematic nomination potential

Component of a historic site or landscape

Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, and spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility

Historical associations require further investigation

NDCRS ARCHITECTURAL FORM**PAGE 3 – Feature Data****Field Code** Meyer Township School #1**SITS#** 32 **PI** 85Complete one Page 3 for *each* architectural feature at the site.**1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school, foundation was not noted. The roof of this L-shaped building consists of a hip roof over the mainbody of the school and a gable roof over the entry/vestibule, all covered with asphalt shingles. There is a bell tower on the roof of the entry with a peaked roof also covered with asphalt shingles. The soffits are open on this school. There is a metal chimney pipe on the west slope of the school. There are also roof vents on the west and east slopes of the roof. The roof extension above the door on the entry has three brackets for support.

The siding on the school is 4 inch wood lap with metal corner trim. There are concrete steps leading to a wood platform porch. There are half walls to either side as you climb the steps to the porch. The wood door has had the lower half kicked in since pictures were taken. Above the door is a sign that reads Meyer Twp School No. 1 and above the sign is an outdoor light. There are a number of windows, three on the west side are covered and the covering appears to be plywood inserts with framing around each window. There is another on the north side and what appears to be two more on the east side, all covered in the same manner. The windows to the south are two pairs of multipane, double hung windows with most of the glass intact. The pair to the west side are covered while the pair to the east side are partially covered. On the east side of the entry there is a small covered window. The floor is tongue and groove hardwood. The walls and ceiling in the school are of lathe and plaster. The walls are tall with a picture rail running along all walls. There are blackboards running along most of the north wall cornering to cover about 2/3 of the east wall. A two panel wood door leads into the school room from the entry/coat room. A fuel oil barrel on the north side of the school would suggest the last heat used in the building was fuel oil furnace.

2. Owner's Contact Information:
