**NDCRS ARCHITECTURAL SITE FORM  
PAGE 3—Feature Data**Field Code Reno Valley Township SchoolSITS# 32 PI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on concrete pillars. It was moved to this location for use as a shop and or for storage. The hip roof of the school is covered with mixtures of wood shakes and asphalt shingles. there is metal capping on the hips and the peak of the roof with metal finials. The entry/bell tower roof has asphalt shingles. The soffits are closed. There is a tall, red brick chimney on the west slope of the roof.

The siding begins under the soffits with a wide trim board. The remainder of the siding is 6 inch lap with 4 inch corner trim. There are three shuttered windows on the east side, a window opening with a bit of framing and another shuttered window on the west side with more windows on the south side, one 2 over 2, double hung window with glass is open and the other two are shuttered. Also on the south wall is an overhead garage door. It looks like they cut out about three windows.

There is an entry at the southwest corner of the school and there was a bell tower above the entry at some point. There is an old 5 panel wood door with a large transom window above it . It doesn't look like they use this for entry. There is lots of junk around this building.

Did not approach this building.
