Roof/Cornice Hip roof

Window Multipane, double hung, some glass

Dating Method(s) Estimate

Miscellaneous Information

Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, and spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

PAGE 3 – Feature Data**Field Code** Hurricane Lake Twsp School #3**SITS# 32** PI**Complete one Page 3 for each architectural feature at the site.****1. Feature Description, Integrity, Eligibility:**

This feature is a one room prairie school that was moved about a mile and 1/2 south of its original location to be used as a garage/shop. It was placed on a poured concrete slab. The chimney was removed and the building reroofed with asphalt shingles. There was an addition added to the south side of the building where the windows most likely were located. The addition lines up with the front entry wall and has metal sheeting on the roof. The soffits are open. The peaked entry roof is supported by corbels.

The siding begins with a rake board on all side of the school. The remainder of the siding is 6 inch wood lap with metal corner trim. Siding on the north side shows a straight line making me wonder if the school was enlarged. There are two, side by side, garage doors on the south side. The addition to the school allowed for deeper acces to the school and I think they removed a bank of windows on the original school house wall. The entry has a 5 panel wood door with an opening for a transom above it. There are three multipane, double hung windows on the west wall and two more on the east wall. All of them have some glass.

4. Description of Access and Site Setting:

This abandoned farm site sits in the middle of fields in all directions. There are farm sites, at a distance, to the NW, NE and SE. One small bin sits just to the east of the school and a metal shed is located to the north. Access to the school is from Hwy 2, about 1 1/2 miles west of York. At County Road 30 (47th Ave NE) go north about 5 miles. No cross roads indicate where the prairie road (67 1/2 Ave NE) is but 68th Ave NE is about 1/2 miles north of the access. Turn right onto the prairie road and go east about 1/2 mile to see the school on your left.

5. Summary of ALL Site Features and Evaluation of Significance:
