**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code Brightwood Township SchoolSITS# 32 RI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on a concrete block basement. The blocks above ground are covered with stucco. The hip roof is covered with asphalt shingles in deteriorating condition. There is a large, red brick chimney with a pipe inside on the south slant of the roof. Soffits were closed but much of the beadboard is falling away. The oprn porch roof is gable with asphalt shingles. The building measures 224 feet north to south and 30 feet east to west. There is a small porch on the east side of the school, reached by several wooden steps with a pipe railing. This measures 6 1/2 feet side by 3 feet deep.

The siding is deteriorating 10 inch fiber board over narrow wood. Corner trim is gone or covered. The porch is finished with the same siding on the north and south sides. The entry door is 5 panel wood with a transom window above it. Inside the entry there are doors to either side giving access to the coat rooms as well as a door into the school room and there is a transom above this one as well. There are three windows on the south side towards the west end of the building, double hung with no glass and they appear to be replacments. There are more older windows inside the building, covered by siding. There is a door on the wouth side of the building that gives access to the basement stairway as well as into the school itself. The walls and the ceiling are lathe and plaster and some of it is falling away. The flooring is tongue and groove hardwood. There are blackboards on the north and west wall. Light fixtures and wires on the outside of the building give proof of electricity.

The basement is mostly emphy space with some old desks stored there. There is a small fuel door on the north wall and windows to the basement, some covered.
