Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Island Park SchoolSITS# 32 RM**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

This feature is a wood framed one room prairie school sitting on a concrete block foundation. The hip roof is mostly covered with wood shakes over wood sheathing. The peak of the roof has metal capping and all the hips have metal corner trim. The eaves have soffits closed with beadboard, some on the east side is falling off. There is a yellow brick chimney located on the south slope of the roof just above a small dormer. The dormer also has a small hip roof.

There is a wide header running under the eaves on all four sides of the school. The siding is 6 inch wood lap with 4 inch wood corner trim. There are two covered windows facing north, two more covered windows and plywood door facing south. A wood step leads up to the door. A closed spot above the door was most likely a transom window. The east side has one window nearer the south end and a bank of 5 windows further to the north, all covered.

The door was locked on this school so do not have information on the inside. There is a light above the entry door and wiring to the north east corner giving evidence of electricity.
