NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data

Field Code Big Bend Township SchoolSITS# 32 RM**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a large, one room priarie school sitting on a concrete basement. The basement lifts the school up about 3 feet off the ground and there are basement windows. The hip roof of both the school and entry are covered with asphalt shingles. A yellow brick chimney sits at the west end of the south slope. There are pipes out the roof on the west slope perhaps indicating bathrooms. The soffits are closed with beadboard. The building measures 20 feet north to south and 32 feet east to west with the entry measuring 12 feet east to west and 10 feet north to south.

There is a wide trim board running under the eaves of the roof on all sides with 6 inch wood lap siding and 4 inch wood corner trim. A waterboard runs around all sides above another wide trim board at the bottom of the siding. There is a bank of 5 large, multipane double hung windows on the south wall of the main body of the school. The entry has two windows on the west end and there are also windows either side of the entry on the west wall of the school room, most of the glass is intact. The entry has a solid core locked door as well as another window to the right of the door. It looks like you enter a ground level and go up stairs to get to the coat rooms.

The interior of the school, as seen through a window, has lathe and plaster on the ceiling and walls. There is a blackboard on the north wall as well as the east wall. The floor is tongue and groov e hardwood. There are desks, a piano and some benches inside the school. No wainscot but electricity is present indicated by wires on the outside of the school as well as light fixtures inside.
