1. Feature Description, Integrity, Eligibility:

This feature is a one room prairie school on a concrete and stone foundation. It was moved twice and is now used as a workshop. A garage addition was added to the west side. The gable roof is finished with metal sheeting. There is a yellow brick chimney. The soffits are closed. The school portion measures 25 feet north to south and 18 feet east to west.

A rake board begins the siding under the eaves at the peak ends of the school. The siding on the north and south walls is wood lap siding with wood corner trim. The east side was covered with horizontal metal siding. There are two newer windows on the east wall. There are three double hung windows on the west wall inside the school that look into the garage addition. The interior walls are a combination of beadboard and wallboard. The ceiling is beadboard. There is some wainscot. The blackboards were removed. Electricity is present. The floor was replaced.

2. Owner's Contact Information:
