Dating Method(s): professional estimate

Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
 - Contributes to a potential district
 - No nomination potential
 - Will not contribute to a district
 - Potential district—feature would be a contributing element if other properties constitute a district
 - Thematic nomination potential
 - Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Dunbar Township School

SITS# 32 SA _____

Complete a Page 3 for each feature.**1. Feature Description, Integrity, Eligibility:**

The feature is a wood framed one room prairie school on a poured concrete foundation. The gable roof of the main body of the school is covered with asphalt shingles over wood sheathing. The hip roof of the north addition has wood shakes over wood sheathing, some are missing. The hip roof on the south side also had wood shakes, here the wood sheathing is about all that is left. Metal capping runs along the hip seams on both of the additions. There is a red brick chimney located at the north end of the gable roof.

There is a wide, header under the eaves at the peak ends of the school. A wide header is also under the eaves of the hip roof additions both north and south. Siding is 6 inch wood lap with 4 inch corner trim. Little to no paint remains on much of the building. There are two double hung windows facing to the north, one is mostly covered and both have intact glass. On the west side there is a single double hung window, partially covered. There are covered windows on the east side but I could not get close because of the large tree growing along much of that side. There is a door at the north end of the east side, it goes into the addition from a concrete step. The south addition has two covered openings as well as a door to the east. I did not get inside this school.
