PAGE 3—Feature Data**Field Code Lamont Township SchoolSITS# 32 SH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting in a farm yard. The school has a shed entry, measuring 10 by 5 feet, to the east with the door facing south. The shed roof is covered with asphalt shingles and the main body of the school has shakes on the roof. There is a newer concrete block chimney in the middle of the gable roof. The roof has metal ridge cap running the length. There is an 8 inch wide trim board under the peak of the roof. The siding is 6 inch wide lap with 6 inch corner trim boards. The school measures 22 feet east to west and 18 feet north to south. It looks like the shed may have been added at a later date as the inside of that entry has the same lap siding as the rest of the school. There is one small window in the entry with no glass in it. There is a concrete pad just outside the shed door. The inside entry door is wood with a window in the top 1/3. The main body of the school was broken up with walls and this building was used as a house at one point. The main walls are lath and plaster with wall board used in the dividing walls. The ceiling is missing in some places and in one room there was an attempt made to put in a dropped ceiling. The floor has linoleum with some rooms back to hard wood. There are electric fixtures in the ceiling indicating electricity. The windows of the main body of the school all have the glass intact. Schools in Lamont Township closed in 1960. We are not sure if this school was originally a Lamont Township school or not. The owner did not know where it came from.
