**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Boone Township School #4SITS# 32 SH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting in the corner of a wheat field. The hip roof has shakes with many missing. All the roofing angles are covered with metal ridge cap. The chimney is starting to fall away with some brick missing on the southwest corner. The building has 6 inch lap siding with metal corner trim. There is plywood over all the windows of the main body of the school. The school sits on a basement. The east side has an opening with steps that allow access to the basement, there is also an opening on this side for delivery of fuel. Any basement windows are also covered. There was electricity in the school and the flag pole still stands on the south side of the building. The entry porch is wood and has fallen away from the school. I could see into the entry to note that the walls are lathe and plaster with wainscoting. The floor is tongue and groove hardwood. In visiting with a student of the school I learned that the coat room was located in the basement. At one time they also used a coat room on the main level to the right of the entry door. There were 5 windows that faces to the east and the blackboards were on the west and north walls. There were windows for light in the entry way as well as to either side of the entry as well. Heat was coal first, later an oil burner before having a propane space heater for warmth. This school closed in 1960.
