PAGE 3—Feature DataField Code Georgetown Township SchoolSITS# 32 SH**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school that measures 20 feet east to west and 12 feet north to south. The roof is mostly covered with shakes and there is a leaning flag pole at the east end. A newer looking brick chimney is at the west end. The siding is 6 inch lap with a wide trim board under each roof peak. The door and windows are all gone with hole where they were. There were 3 windows on the north and three on the south sides of the school. A broken down wood porch leads into the school on the east side. Along the outside walls there are holes that were drilled in the siding to blow in insulation. A student of the school mentioned that there was a porch on the east side when he attended school. Inside the school there is a shelf and hooks to the right and another tall shelf unit to the right. The floor is tongue and groove hardwood, the ceiling is covered with bead board and the walls have wall board covering them. It looks like there was wainscoting and it was torn off the walls. Blackboards were on the west wall, on the north wall between windows. There was electricity as I saw light fixtures inside the school. The school, called Georgetown School #3, was closed in 1957.
