**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**Field Code Sioux County SchoolSITS# 32 SI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The gable roof of the main body as well as the shed addition on the south side are covered with metal sheeting. There is a red brick chimney at the north end of the peak. The soffits are open. The school measures 28 feet north to south and 20 feet east to west.

Much of the siding on the school is vertical ribbed metal sheeting, with the exception of the peak ends where it is 6 inch wood lap, beginning at a point in line with the bottom of the roof and up to the wide trim board just under the peak. All the corner trim is metal. A repaired locked wood door gives entry from a concrete pad. There is a small fixed pane window to either side of the door on the south wall. There are two double hung windows on the north side and a bank of 7 double hung windows on the east side, all glass intact and there are storms on all the windows. The interior walls and ceiling appear to be wallboard with no wainscot. There is tongue and groove hardwood flooring. There is a blackboard on the south wall of the main school room from the west wall to the door from the entry. Light fixtures and power box on the north wall suggest electricity.
