**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Belfield School #1SITS# 32 SK**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The gable roof is covered with metal sheeting on the south slope and wood shakes on the north slope with metal capping. There is no chimney. The soffits are open. The building measures 30 feet east to west and 18 feet north to south.

There is a wide trim board under the soffit on the peak ends of the roof. The remainder of the siding is 6 inch wood lap with 4 inch wood trim. There are vents under the peak at both ends of the school. The south wall has a plank door with large hinges, added after the window opening were all sided over. On the west wall of the school are two more window openings that were covered, one with plywood and the other filled in with siding. There is a 5 panel wood door with a filled in transom at the top of concrete steps. No entry to this school. Wiring on the west side of the school suggests electricity at some point.
