PAGE 3—Feature Data**Field Code Slope County SchoolSITS# 32 SL**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a large one room prairie school. The hip roof of the school is mostly covered with wood shakes with some metal capping. The soffits are closed. There is a red brick chimney on the south slope of the roof with a metal stove pipe extending out the top.

There is a wide trim board under the eaves on all side of the building with the remainder of the siding 6 inch wood lap with 6 inch wood corner trim. On the south side of the building there are two sheds, one that looks to have been connected to the school and another small entry shed, mostly for protection from the weather. There is one double hung, with glass window on the west wall in the entry connected to the school. Other windows in the school are large, vented glass block windows with most of the glass intact. It looks like large windows openings, 5 on the east side and two more on the north, were closed near the top before the newer windows were installed to fill the space.

Didn't go onto this property.
