NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code McCord Township SchoolSITS# 32 SL**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a concrete foundation. The hip roof of the school and entry are covered with asphalt shingles. The south slope of the entry is connected to the main body in a seamless pattern with the shingles going up to the roof peak. There soffits are closed with beadboard.

The siding is 6 inch wood lap with 6 inch corner trim. Also at the corners is metal sheeting, wrapped around the corner trim for varmint control. The south entry door is locked, 5 panel wood. A concrete step leads to the entry door with a wood hand rail. There is another solid, locked door on the east side with entry gained by use of a ramp with hand rails either side. There is one fixed pane window to the west of the south entry door, glass intact, another to the east of the door is shuttered. An opening on the west wall of the entry might be a fuel door. On the east side are two newer windows either side of the door with intact glass. A light fixture next to the door suggests electricity.
