Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code MAC-YPS-4SITS# 32 SN 731**1. Feature Description, Integrity, Eligibility:**

The schoolhouse (Feature 1) is an old one-room clapboarded school with a projecting front entry. It measures approximately 12 meters (40 feet) north-south by approximately 8 meters (26 feet) west-east. The main structure has a hipped roof with flared eaves, while an intersecting (cross) one-and-a-half-story entryway/foyer has an open gable roof. Its longitudinal axis (ridge) runs parallel to 75th Avenue SE, the road that the building fronts. The entryway structure projects from the east wall some 2 meters (6 feet), and has a single door with a semi-circular window over it. North of the entryway along the east wall is a bank of four windows. The windows are vertically hung, double-sash, with three panes over three. The panes are very much elongated vertically, and, being the same width as the mullions, are presumably intended to reiterate one another stylistically. The south wall of the building shows evidence of two cut-outs being replaced with newer clapboarding. The larger one is centrally located, and the other, smaller one, abuts it to the east. It is most likely that the main one or perhaps both had been window openings originally. The west wall has massive foundation disturbance which has caused the sill to rupture. Feature 1 has an electrical lamp over the entryway window.

2. Owner's Contact Information:

3. Access (to rural areas):

From Jamestown proceed approximately 11 miles south on U.S. 281. From the intersection of U.S. 281 and Stutsman County Route 38/47th Street in Sydney proceed eight miles west on County Route 38. Turn left on 75th Avenue SE and proceed four miles south to its intersection with 52nd Street SE. School No. 2 is approximately 30 meters southwest of this intersection.

4. Site Area (ft²): 17,438

5. Site Description:

The site is located on slight hill at the intersection of 75th Ave SE and 52nd Street SE. There is a small lake to the south of the site. The vegetation consists of herbaceous sage, tall prairie grasses and weeds. There are hardwood trees both in front of the schoolhouse and bordering the schoolyard between both the cultivated field to the west and the road to the north, respectively. There are a number of bee hives between the road to the north and Feature 1.

**NDCRS ARCHITECTURAL SITE FORM
PAGE 5—SITE DESCRIPTION**Field Code MAC-YPS-4SITS# 32 SN 731**6. Summary of All Site Features & Evaluation of Site Significance:**

The site retains good physical and spatial integrity. Feature 1, the schoolhouse, is still standing, and could provide useful information both as an architectural entity and as an archaeological site. Feature 3 is likely collapsed in place, and although integrity has been destroyed as an architectural entity, it may still provide useful information as an archaeological site. Feature 2, the rectilinear anomaly adjacent to Feature 1, obviously has no standing component, yet may also yield useful information as an archaeological site.

Avoidance is recommended. The proposed line can be rerouted to the other side of the roads, 52nd Street SE and 75th Avenue SE.
