**NDCRS ARCHITECTURAL SITE FORM****PAGE 3—Feature Data**Field Code Durham Township School #2SITS# 32 SN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

This feature is a wood framed one room prairie school on a foundation of concrete and rocks. The roof of the building is covered with asphalt shingles. The chimney is gone. The fascia is falling away from the edge of the roof. The eaves have soffits enclosed with beadboard. The school measures 22 feet east to west and 36 feet north to south.

A wide header can be see under the eaves on all sides of the school. The siding is 4 inch wood lap on the top 2/3 of the school with a 6 inch decorative trim board and 6 inch wood lap finishing the lower 1/3. 4 inch corner trim finishes the siding. There is a door on the east side near the north end of the school. Another old wood door give entry on the west side near the north end. A porch roof was over the door at some point, it can be seen in a heap in front of the entry. There are two covered windows on the north side of the building, they would be in each of the two coat rooms. On the west side there are 5 large, multipane double hung windows with four covered and the 5th missing much of its glass.

The inside of this school would be just like another I saw with blackboards on the south and east walls. The entry area is small, leading into the school room through a door to the right. The coat rooms are accessed from the school room, and there are two.

I was unable to approach this school as the dog from the farm came to visit.
