Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Germania Township SchoolSITS# 32 SN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a simple, wood framed one room prairie school on concrete foundation. The hip roof is mostly covered with wood shakes over wood sheathing. The very top of the roof has no capping, there is metal capping on the 4 sloping roof seams. There is a tall, red brick chimney at the southwest corner of the west slope. The chimney has two wires anchoring it to the roof. The eaves have soffits closed with beadboard. The building measures 32 feet north to south and 20 feet east to west.

The siding is 6 inch wood lap with 4 inch wood corner trim, no paint. There was a small roof over a porch, it has fallen off and lies at the door. This porch had two half side walls as railings, the south wall shows where they were. There are two openings on the south wall that were windows in the coat rooms. All glass and most of the frame work is gone. Also on the south side is a doorway, no door. You step into the small entry area and continue on through another doorway to the main body of the school. The coat rooms are to either side of the entry and are reached through doorways from the school room. The east wall had 5 large windows, most likely double hung, but are only open holes today. The floor is tongue and groove hard wood, much of it pulled up. The walls are lathe and plaster with wainscoting all sides as well as in the entry and coat rooms. The ceiling is covered with beadboard. The blackboards were located on the west and north walls. Wires upper outside east wall indicate electricity.
