Other Information:

Foundation Couldn't see Stories 1

Roof/Cornice Hip

Window double hung, glass missing

Dating Method(s): professional estimate

Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
Contributes to a potential district
No nomination potential
Will not contribute to a district
Potential district—feature would be a contributing element if other properties constitute a district
Thematic nomination potential
Component of a historic site or landscape
Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
Historical associations require further investigation

NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature DataField Code Iosco Township SchoolSITS# 32 SN**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a simple, wood framed one room school. I could not get close enough to see the foundation. The school has a mixture of asphalt shingles and wood shakes over woodsheathing. There are few shingles of any type on the south slope. There is metal capping at the peak of the hip roof with finials on either end. Metal capping also finishes the 4 seams on the slope of the roof. There is a red brick chimney on the north slope.

There is a wide header under the eaves on all four sides of the school. The siding is wood lap with no paint left. The west side of the school has two covered window openings. On the south side there is a 5 panel wood door at the west end of the south side with 5 large window openings that cover the rest of that wall. The windows are half covered, no glass in any of them. Wiring at the right side of the door would indicate electricity was present at one time.

I did not get into this building as it was in a pasture.
