NDCRS ARCHITECTURAL SITE FORM**PAGE 3—Feature Data**Field Code SITS# 32 **Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school sitting on concrete blocks in a farm yard. There are two chimneys on the roof of the school, a red brick chimney sits at the peak at the east end of the roof and another metal chimney is locted on north slope of the entry roof. The roof is covered with tin. The soffits are open.

Rake boards can be seen under all peaks of the roof and the remainder of the siding is 6 inch wood lap, painted red. The corners are finished with 4 inch wood corner trim and are painted green. There is a small, wood door on the north wall of the entry, perhaps a fuel door. The entry door to the school is reached from a concrete porch. A newer glass and screen door leads to a glass topped wood door. To either side of the entry door are small, double hung windows with intact glass. The south wall has a bank of 6 larger, double hung windows with all glass intact. The walls and ceiling in the school are finished with original lathe and plaster. There is wainscot in the main school room. The floor is tongue and groove hardwood. There are blackboards in the school as well as wainscot on the walls.
