Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school on a foundation of concrete and rocks sitting in its original location. The roof is partly covered with asphalt shingles over wood shakes and most of the roofing material on the east side is gone. There is a stub of a chimney at the south end of the roof with a pile of bricks laying on the ground by the south wall. There is metal capping with finials at the top off the roof with a flag pole standing proud at the north end of the roof peak. The school measures 24 feet north to south and 16 feet east to west with an entry measuring 6 feet by 8 feet.

The siding is 6 inch wood lap under rake boards at all peaks. The corner trim is 4 inch wood. A door opening leads into the small entry while another door opening leads into the school. There are nails inside the entry for coat hooks. Three window openings are on both the east and west walls with nothing left of the glass and framing. The entry has a window opening on the east side. The walls and ceiling were covered with lathe and plaster with much falling into the school. The floor is tongue and groove hardwood. Wiring on the outside of the school on the south end and light fixtures inside would indicate electricity was present sometime in the past. One blackboard remains on the west half of the south wall and evidence of another is on the east half. That one has been removed.
