UPDATE

Field Code Edendale School #3

SITS# 32 ST 40

Complete a Page 3 for each feature.

1. Feature Description, Integrity, Eligibility:

The feature is a one room prairie school sitting on a concrete foundation. The school was moved to this location to be part of a museum complex. The gable roof of the school and the entry are covered with asphalt shingles as is the shed at the north end of the school. There is a red and orange brick chimney at the peak of the roof at the north end of the school room. The building measures 44 feet from north to south and 18 feet east to west.

The siding of the school has a wide trim board under the peak ends of the roof on the entry as well as both ends of the school. The remainder of the siding is 6 inch wood lap with 4 inch corner trim. The building is painted red with white trim. There is a flag pole at the south end of the peaked entry roof. There is a newer door on the east side of the north shed with a windows to the left of the door. Another small, double hung window is on the west wall of the shed. The school has a bank of 6 double hung, 2 over 2, windows on the west side with glass intact. All the windows have shade which were pulled down so we did not see much in the school. There is another entry door on the south side of the entry. Two small, fixed pane windows are located on the south wall near the east and west sides just under the roof line. There is a blackboard on the east wall. The floor is hardwood. A light above the entry door suggests electricity.
