**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Perth Township School #2SITS# 32 WA**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete basement. Letters on the east wall fo the school tell us this is the Perth Twp. Hall. The gable roof of the school and the entry are covered with ribbed metal sheeting. There is concrete chimney on the north slope of the roof near the east end. The soffits are closed. The building measures 38 feet east to west and 18 feet north to south.

There is a wide trim board located under the soffits at the peak ends of the roof. The siding is 6 inch wood lap with 6 inch wood corner trim. There is a concrete step and porch leading to a newer, solid core, locked door. Another door to the left of the entry door leads to the basement. There is a flagpole to the right of the steps. There are two double hung windows on the north wall of the entry and one on the south. The south window lights up the stairway to the basement. There are three double hung, two over two, windows on both the north and south walls of the main body of the school. All the glass is intact. The interior of the school has wallboard on the walls and tiles on the ceiling. The flooring looks to be linoleum. This building has been used as a township meeting hall and they have tables and chairs. There is a blackboard on the west wall and it wraps around the north wall to the first window. Light fixtures suggest electricity.
