**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**Field Code Shealey Township SchoolSITS# 32**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school on a poured concrete foundation. The gable roofs of both the main body and the entry are covered with asphalt shingles. There is a short, red brick chimney at the north end of the peak of the roof. The soffits are closed. The building measures 28 feet from north to south and 18 feet east to west with the entry measruing 10 feet north to south and 8 feet east to west.

There is a wide trim board at the soffits under all peaks of the roofs. The remainder of the siding is 6 wood lap with 6 inch corner trim. There is a concrete step leading to the door opening, the door is gone. The interior walls and ceiling are wallboard and there is no wainscot. The wall board on the ceiling is falling away. The window openings have little framing and no glass. There are attic vents at both the north and south ends of the school near the peak of the roof. A light fixture and wiring suggest electricity was present. The flooring is tongue and groove hardwood. There are blackboards on the west half of the north wall as well as between the 1st and 2nd windows from the south on both the east and west walls.
