**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Lund Township School #2SITS# 32 WD**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a onr room prairie school on a concrete block foundation. It was transformed into a home in the past. It looks abandoned today. The gable roofs of the main body of the school as well as additions to the east and west are covered with asphalt shingles. The soffits are closed. There is a metal pipe on e the roof of the east addition, perhaps for heat. A propane tank sits to the east of the building.

There are wide trim boards under the soffits of the peak ends of the roof as well as the additions with the remaining siding being 6 inch wood lap with a mix of 6 inch wood corner trim as well as metal corner caps. The windows are all newer with a single double hung window on the east and north wall of the east addition, a picture window on the south side of the main part of the school, two double hung windows on the west wall and a multipane, three panel window on the north part of the large section. Two locked doors are located on the south side, one at the west end of the west addition and another in the middle of the east addition. Both reached by way of a concrete step/pad. The interior walls are paneled, the ceiling is tiles and the floor is covered with carpet. There are no blackboards. Electricity is present suggested by wiring and meter box.
