**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM****PAGE 3—Feature Data**Field Code SITS# 32 **Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school. This school was moved to the Makoti Threshing Grounds and placed on three horizontal concrete pillars. It has been furnished for the time period it was a school. The roof is metal with no exterior indication of a chimney. The building measures 18 feet north to south and 21 1/2 east and west with a shed measuring 10 feet by 8 1/2 feet. The soffits are open.

The siding is vinyl and looks very much like the original wood siding. Good preservation effort for this building. A concrete pad with wood steps leads into the entry. The door is a 5 panel wood door with yet a second similar door giving access from the entry into the school. The walls and ceiling inside the entry are finished with beadboard. There is one small, 4 pane, fixed window in the entry. Coat hooks remain on the walls. There are double hung windows either side of the entry on the east wall of the school room. Two pairs of double hung windows are on the south wall of the school. There are middle pull window shades on these windows. All windows have intact glass. The walls in the school room are finished with wall board with the lower third being wainscot. The ceiling is covered with beadboard. There was no electricity in the building. There is a red brick chimney on the west wall with a non functioning stove connected to it. The blackboards are on the north wall, the entire wall has blackboards at older children height and two more blackboards are installed at a lower height right in the middle of the wall. The floor is hardwood.
