NDCRS ARCHITECTURAL SITE FORM**PAGE 3—Feature Data**Field Code SITS# 32 **Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairie school moved to this location from within Hiddenwood Township and placed on a slab of concrete. The roof is covered with asphalt shingles and the soffits are closed. There is an airvent on the north slope of the roof. Soffits are closed and finished with metal. The main part of the building measures 32 feet east to west and 24 feet north to south. The south addition measures 10 feet north to south and 14 feet east to west and was originally used as a teacherage.

The siding is 6 inch wood lap with metal corner trim, all painted red. There are two replacement, double hung windows to either side of the entry door. The newer style entry door is reached under a porch roof supported by two pillars. Two newer, double hung windows are located on the north wall, replacement windows for the removed bank of windows that was original to the school. There is a vent on the north wall for a propane fireplace located inside. Two more double hung, multipane upper windows are located on the south wall. These are original to the school. There are shutters on each side of these two windows for decoration along with a decorative cornice above the windows. These windows are covered with storm windows. There is an entry area into the school with a 5 panel wood door for access. To the north is the coat room with a 5 panel wood door leading into it from the main room. To the south another 5 panel wood door leads into a small room that was access to the stairway to the old basement. One more 5 panel wood door leads into the south addition. The floor is tongue and groove hardwood and the wall are mostly lathe and plaster with a wide trim board at the floor. Some areas have been sheetrocked. There is a picture rail on all walls inside. Blackboards were removed. There is also no wainscot.

The school was moved to this location for an use as an office. The entire north wall is covered with book cases and as previously mention a gas fireplace is located on the west wall for a heat source in cold weather. This school was built in 1925 and closed in 1957.
