Foundation concrete blocks Stories 1

Roof/Cornice Pyramid Hip Roof, some rain gutters on the south and east side

Window most appear to have been changed

Dating Method(s): School Records

**Feature Preservation Recommendation(s) (Check all that apply):**

- Individual nomination
- Contributes to a potential district
- No nomination potential
- Will not contribute to a district
- Potential district—feature would be a contributing element if other properties constitute a district
- Thematic nomination potential
- Component of a historic site or landscape
- √ - d Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

**NDCRS ARCHITECTURAL SITE FORM**  
**PAGE 3—Feature Data**

Field Code

SITS# 32 WE

**1. Feature Description, Integrity, Eligibility:**

This is typical of a square one-room prairie school. It was moved from the northwestern part of the township to its present location to be used as a teacherage. The building was divided into rooms for living space. The school next door to the teacherage was torn down some years ago but the original Antelope #4 school building is still standing.

The roof is asphalt shingles over a wood sheeted roof. There are some eaves troughs along the south and east side to provide for drainage. The siding is wood lap siding and appears to be original. A ramp has been built to allow handicapped individuals to get into the building. The front door is a newer style door that leads into an entry area. The school building is locked so I could not go inside. There is a wood step and porch for the entry. One window on the west side could be original but the other window on that side has been replaced with newer, more efficient windows. Replacement of the siding at the location of the windows shows changes. It appears that new windows were added to the south side as well as more on the east. On the east there appears to be one window that might be original. The building measures 28' by 28'. It sits in an alfalfa field on the south edge of Chaseley.

Looking in the windows I can see that they divided the building into about 4 rooms. Walls inside are of sheetrock and painted. The inside appears to be in fair condition.

The original location was the NE corner of the NW  $\frac{1}{4}$  of Sec. 8. The Antelope School District was organized September 2, 1899. According to a history book on Chaseley ND, Antelope School #4 was built in 1912. Teachers records indicate it closed in 1943 for lack of students. Estimates of the date, by former students and Chaseley residents, the school was moved are last 1940's or 1950.

SITS# 32 WE

**Complete one Page 4 for the entire site.**

## 2. Owner's Contact Information:

Unkown

## 3. Access (to rural areas):

From Hwy. 200 you drive north on #4 or 34<sup>th</sup> Ave about ½ mile and you will see the school on the south side of Chaseley.

## 4. Site Area (ft\*):

## 5. Site Description:

The school is on the south side of town with a house directly across the street to the north. The other three sides look out at slightly rolling farm land.
