This building is the main body of the former Eddy School #1, it was moved to the present location in 1977. It came from a location 6 1/2 miles to the west and north. The entry/porch of the school was left at the original location to serve as a town hall. (See Eddy School #1, Entry/porch) The school was moved to this location to be used for a garage or storage. This was a large school measuring 30 feet east to west and 20 feet north to south. It was placed on poured concrete footings and the floor and all the plaster were stripped out of the building. All the windows, 5 in total, were removed and boarded up. There is one small window located high on the west end of the south side of the building. The roof shows remnants of shakes with many holes through the shakes and underlying boards. This school had a gable window at the north end, boarded up now. The west wall is covered with metal. The east wall was cut open to install sliding doors for access to the building. It had electricity in the original location, hooked up in 1952. At one point in the history of this school there was a temporary divider put up and they had two teachers for separate rooms. This school closed in 1959.
