Field Code   Klindworth Farm  SITS#   32     WE  **Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

This feature is a one room school building that was moved to the present site and made into a house. The building measures 24 feet 4 inches north to south and 38 feet four inches east to west. The hip roof has asphalt shingles and they are in good shape. There is also a modern brick chimney, a bathroom vent and a TV antenna on this roof. Eaves troughs are all around the roof and the soffit is enclosed. All four outside walls have headers under the roofing. The building has 3-4 inch lap siding with metal corner caps.

The entry to the west could be original to the school. There is a small roof over the entry door and it would be a guess to suggest it was present during the buildings school days. Concrete steps with railing either side give access to the house. There are windows to either side of the entry door. There is also a back door, facing east. Concrete steps lead up to that door as well. The building has electricity.

The interior of the building was mostly changed with the erection of walls for bedrooms, a bathroom, a laundry and kitchen/living room. There are hard wood floors in the living area as well as the bedrooms. Linoleum in other rooms. The walls are sheet rock and all windows and trim were replaced. It is a home. There is a basement and that is finished for living space. The heat today is propane.

I attempted to learn where the school came from and found differing stories from several people living in the area so will only say that it was moved and was, perhaps, a Hamburg Township School.
