Feature Preservation Recommendation(s) (Check all that apply):

- Individual nomination
 - Contributes to a potential district
 - No nomination potential
 - Will not contribute to a district
 - Potential district—feature would be a contributing element if other properties constitute a district
 - Thematic nomination potential
 - Component of a historic site or landscape
- Moved (specify all applicable choices)—a) relocation occurred within a historic period; b) recreates original site, orientation, landscape, & spatial relationships; c) compatible in context with neighboring structures; d) relocation has damaged eligibility
- Historical associations require further investigation

PAGE 3—Feature Data

Field Code JUP-16015-605SITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

Feature 1 is a school. Feature 1 measures approximately 40 feet north/south and 25 feet east/west. Feature 1 has a concrete foundation and front steps. The concrete predominantly consists of well sorted gravels. There is a basement walk-in on the eastern side of the foundation that appears to have been patched or lined with a concrete with poorly sorted gravels and a tan cement. The parts of the basement that are visible have concrete walls and flooring. The basement is divided into two rooms, a boiler room and a furnace room. There are three boarded windows to the basement on the eastern side of the foundation, two on the northern side, and four on the western side. The main part of the school has horizontal wooden siding with vertical wooden corner protectors. Feature 1 is painted white, and the paint is in fair condition. Feature 1 has been wired for electricity. The door and the concrete steps leading up to it are on the south side of the building. There are a single hung window, a round window, and a window composed of glass blocks set into the southern elevation. The round window is set into a gabled dormer centered over the entryway. The doorway is original, but the door is no longer in place. In the eastern elevation are one single hung window and two large square areas that cover almost the entirety of the eastern elevation. There is a wooden box just under the eaves on the eastern elevation. Feature 1 has a gable roof with wooden tiles and a metal roof ridge. There is a brick chimney on the western edge of the roof ridge; it is in poor condition. There is a metal pedestal attached to the top of the dormer. There is a cupola that has fallen to the ground next to the front steps of the school. The cupola has a sheet metal roof that forms a peak; the cupola is painted white. A wooden door is lying on the ground next to the steps.

Feature 1 is in fair condition. Feature 1 maintains aspects of structural integrity, including workmanship and materials, and shows no signs of having been moved. Feature 1 maintains a rural, agricultural setting. Further work is recommended to better understand the relationship of Feature 1 to other historic sties in the area.

Independently, Feature 1 is unevaluated for the National Register of Historic Places. Feature 1 does not meet Criterion D, having significant information potential. Further work is recommended to better understand eligibility under Criteria A, B and C, association with a significant event, association with a significant person, and having significant design.

PAGE 4—SITE DESCRIPTION**Field Code JUP-16015-605SITS# 32 WI**Complete one Page 4 for the entire site.**

2. Owner's Contact Information:

Private

3. Access (to rural areas):

From Tioga, ND, travel four miles south on ND Highway 40/104th Ave NW. Turn right (west) onto US Highway 2 and travel one mile. Turn left (south) onto 105th Ave NW and travel five miles. Turn right (west) onto 59th St NW and travel one mile. The site is on the right (north).

4. Site Area (ft²): 26,2645. Description of **SETTING**:

Site JUP-16015-605 is located in a predominantly agricultural area south of Tioga, ND. The surrounding area is a mix of pasture and crop land, and the site has agricultural fields on three sides. The area has been extensively developed for oil exploration. There is a well pad 300 feet west of the site. Historic Site 32WI1544 is located 417 feet northwest of Site JUP-16015-602; the relationship between these sites is unknown. There are only small shifts in the terrain, and so the major impediment to the view is tree lines.

**NDCRS ARCHITECTURAL SITE FORM
PAGE 5—SITE DESCRIPTION**Field Code JUP-16015-605SITS# 32 WI**6. Summary of ALL Site Features & Evaluation of Significance:**

Feature 1 is a school. Feature 2 is a metal frame for a clothes line. Feature 3 is a concrete pad. Feature 4 is a collapsed sign. Feature 5 is a square depression. Feature 6 is a collapsed structure. Features 2-6 are described in the following historic site description.

Site JUP-16015-605 is in fair condition. The features of the site maintain their associations with each other and a rural setting. Feature 1, the school, maintains aspects of structural integrity such as workmanship and materials. Features 2-6 lack significant aspects of structural integrity.

Site JUP-16015-605 is unevaluated for the NRHP. Site JUP-16015-605 does not meet Criterion D, significant information potential. Further work is recommended to better understand the eligibility of the site, notably Feature 1, under Criteria A, B and C, association with a significant event or person, and having significant design.
