**NDCRS ARCHITECTURAL SITE FORM
PAGE 3—Feature Data**Field Code Hartsoch SchoolSITS# 32 WI**Complete a Page 3 for each feature.****1. Feature Description, Integrity, Eligibility:**

The feature is a one room prairies school on a poured concrete foundation. There are two additions to either end of the school and all the gable roofs have wood shakes with metal capping and finials. At the west end of the peak of the main body there is a yellow brick chimney. There is also a metal pipe on the north slope, near the peak, about the middle of the roof. The soffits are closed. The building measures 42 feet east to west and 18 feet north to south with the west addition 10 feet by 8 feet and the east entry 6 feet by 8 feet.

The siding begins with a wide trim board under the peak on all the ends. The remainder of the siding is 6 inch wood lap with 6 inch wood trim. There are two small double hung windows at the west end of the west addition where the toilets are. Another double hung window on the south wall of the entry is boarded up, glass is intact. The bulk of the south wall of the school room is covered with two, large vented glass block windows, likely replacements. The vents are boarded over. The entry is reached from a concrete stoop up two steps to a 2 panel wood door. The interior walls of the entry are covered with beadboard. The walls and ceiling of the school room are covered with wallboard. The blackboard is at the west end of the school room and it corners onto the west third of the north wall. The floor is tongue and groove hardwood. At the west end of the school there is a stage the entire width of the school. A door to on the south end of the west wall leads to the toilets. Light fixtures suggest electricity.
